Kjeldahl Digestion Apparatus

Kjeldahl Digestion units are designed for laboratories that require separate digestion stations. Six-Place Digestion units draw fumes through the manifold using a remote blower exhaust system.

These units may be placed in a well ventilated room away from normal laboratory operations or placed inside a floor-mounted chemical fum hood. The Two-Place Digestion Unit offers the same rugged construction as larger Kjeldahl models, plus it is compact and may be placed inside a fume hood.

Two-place and six-place macro Kjeldahl units are designed for laboratories that require separate digestion stations.

Additional Features & Specifications

Features

- Welded and epoxy-coated steel framework
- Electric digestion heaters with curved ceramic bases to cradle 500 or 800 ml Kjeldahl digestion flasks.
- Individual infinite-control knobs for electric heaters with variable input from 20-100% capacity
- Chemical-resistant CPVC fume manifold with heat-resistant PTFE nipples that draw chemical fumes from the digestion flasks.
- Full one year warranty

Options

- Six-place, floor-mounted models available with blower exhaust in various electrical configurations. They require wiring to a main circuit breaker panel.
- Two-place, benchtop model with water aspirator and 3-wire cord with plug

Required Accessories

- Kjeldahl digestion flasks
- Remote exhaust blower
- Ductwork

Optional Accessories

- Laboratory Carts and Benches
