

WaterPro BT Water Purification Systems

Turns almost any laboratory sink into an on-demand, ultrapurified water station. A quick disconnect coupler with bypass allows this portable benchtop unit to produce Type III RO purified water or Type I lab grade water from standard tap water.

- Compact all-in-one benchtop design
- Ultrapure Type I water, up to 18.2 megohm-cm
- Pure Type III RO water
- Typical rate of >0.5 liters per minute
- Optional UV lamp available

Type I water is ideal for many applications including instrumental trace element analysis, mixing standardized acid/base solutions, and media solutions. An optional UV lamp further reduces the bacteria and TOC levels necessary for life science applications.
