

Purifier Horizontal Clean Benches

Purifier Horizontal Clean Benches direct HEPA filtered air horizontally over the work area to provide ISO Class 5 (formerly Class 100) conditions and protect your work from particulate contamination. Applications for clean benches include plant tissue culture, media plate preparation, electronics inspection, medical device assembly and pharmacy drug preparation. Because they do not provide protection to the user, they should not be used in conjunction with biohazardous material, toxins or radionuclides.

Purifier Horizontal Clean Benches are available in 3', 4', 5', 6' and 8' widths.

Labconco also offers Purifier Vertical Clean Benches that direct HEPA-filtered air down over the work area and Purifier Filtered PCR Enclosures, which are specialized vertical clean benches designed for polymerase chain reactions.
