

RXPert Double Filtered Balance Systems

Patented RXPert Double Filtered Balance Systems are Class I biological safety cabinets that contain airborne particulates and powders providing user protection during hazardous drug compounding or pharmaceutical manipulation. They are designed to meet the USP <800> requirements for non-sterile hazardous compounding.

These systems exhaust air through two levels of HEPA filtration, returning it safely to the lab. Both filters are 100% scannable, and can be replaced using a true bag-in/bag-out system. No ducting is required.
