

XPert Bulk Powder Filtered Systems

XPert Bulk Powder Filtered Systems are designed to provide user protection from hazardous airborne particulates and fumes generated during powder transfer operations. They include a stainless steel work surface with trough to catch spills and transfer caddy. A push button operated electric hydraulic lift raises the bulk powder container, and a beam sensor senses the container's location and triggers the lift mechanism to automatically stop at the optimal ergonomic access height.

Systems includes a built-in blower, 99.99% efficient HEPA filter, true bag-in/bag-out filter disposal system, and pre-wired fluorescent light and switches for blower and light. No ducting is required when exhaust air is returned to the laboratory. Or may be exhausted to the outside with the addition of the optional Canopy Connection, ductwork and remote blower.
